

Michael X. Franovich is Chief of the NRC's PRA Operational Support and Maintenance Branch in the Office of Nuclear Reactor Regulation. His responsibilities include managing a team of PRA practitioners and Senior Reactor Analysts who provide risk assessment services for operational decision-making for the Reactor Oversight Process, Notice of Enforcement Discretion cases, and emergent nuclear safety issues. He has 18 years of nuclear experience and has held diverse positions within the NRC. Mr. Franovich has been an NRC project manager for the Combustion Engineering System 80+ evolutionary plant design, a resident inspector for the McGuire Nuclear Station, and a senior reliability and risk analyst. He holds a Bachelor of Science degree in nuclear engineering from the University of Florida and has completed graduate studies in risk and reliability engineering at the University of Maryland.
