

Mr. Peter Hastings is the Licensing Manager for the Nuclear Plant Development Division of Duke Energy Carolinas. He is also the AP1000 licensing lead for NuStart Energy Development, a cost-sharing consortium under DOE's NP2010 program. In that capacity, he also acts as the AP1000 Design Centered Work Group lead. Mr. Hastings' background includes work as a reactor engineer responsible for startup testing and fuel performance monitoring, design engineer on the Monitored Retrievable Storage facility, and management positions in safety assurance and performance assessment for the geologic repository at Yucca Mountain. Immediately prior to his current assignment, he led the licensing and safety analysis efforts for the Mixed Oxide Fuel Fabrication Facility under 10 CFR Part 70. He earned a bachelor's degree in nuclear engineering from North Carolina State University.
