

Mr. Paul Klein began his career working for five years in the Corrosion Branch of the U.S. Navy's David Taylor Research Center. He spent 13 years at Constellation Energy, involved in materials engineering and corrosion issues, initially at Calvert Cliffs Nuclear Power Plant and then in the corporate metallurgy laboratory. Since coming to the NRC in 2003, Mr. Klein has worked in the Steam Generator Tube Integrity and Chemical Engineering Branch in the Office of Nuclear Reactor Regulation. In this role, he has responsibility for the resolution of chemical effects in relation to Generic Safety Issue 191, "Assessment of Debris Accumulation on PWR Sump Performance."

Mr. Klein has a Bachelors Degree in Metallurgy from the Pennsylvania State University and a Masters Degree in Materials Engineering from the Johns Hopkins University.
