

Mr. Greg Krueger is the Senior Manager of Risk Management at Exelon with twenty-four years of experience in the nuclear utility industry, predominately in the areas of thermal-hydraulic and probabilistic accident analysis for nuclear power plants. He has contributed to the successful development of many of the PRA-related activities in support of plant operation and modeling at Exelon. Mr. Krueger has been involved in numerous industry PRA activities and development of PRA analysis methods for the BWR Owners' Group and the Nuclear Energy Institute. Mr. Krueger received an SRO Certification at Limerick and has a Bachelors degree in Nuclear Engineering and a Masters degree in Mechanical Engineering.
