

RIC 2007
Advanced Reactor Designs –
Session Introduction

Charles Ader
Office of New Reactors
March 15, 2007

Introduction

- Reactor technologies are being considered for NRC review that are significantly different from current light water reactors.
- This session will provide an overview of several of these technologies and the challenges for licensing such designs.

Panelists

- Edward Wallace, Senior General Manager – US Programs, PBMR Pty Ltd
- Thomas O'Connor, Deputy Director, Office of Gas Reactor Deployment, NE/DOE
- Eric Loewen, Manager, Advanced Plant New Production Introduction, GE Nuclear
- Robert Pierson, Director, Division of Fuel Cycle Safety and Safeguards, NMSS/NRC
- Stuart Rubin, Advanced Reactor Program Manager, RES/NRC
