

BRUCE S. MALLETT, Ph. D.
Regional Administrator
Region IV

Dr. Bruce S. Mallett has been the Regional Administrator for the Region IV Office of the Nuclear Regulatory Commission (NRC) since September 2003. Dr. Mallett is a graduate of Purdue University with a Ph.D. in Health Physics. He has both a Masters Degree in biochemistry and a Bachelor of Science degree in microbiology from Wright State University.

Prior to joining the NRC, Dr. Mallett was an instructor at Purdue University in the Biology Department. He also served as the radiation safety officer and medical physicist at Grandview Hospital in Dayton, Ohio.

Dr. Mallett joined the NRC in 1980 as a materials licensing reviewer in the Office of Nuclear Material Safety and Safeguards. Since that time, he has held progressively more responsible positions in Region III and Region II, including materials licensing reviewer and inspector in Region III; Chief, Nuclear Materials Licensing Section in Region III; and Chief, Nuclear Materials Safety and Safeguards Branch in Region III. In 1990, he was appointed to the Senior Executive Service (SES) and served as the Deputy Director and Director, Division of Radiation Safety and Safeguards (renamed the Division of Nuclear Materials Safety) as well as the Director, Division of Reactor Safety in Region II. He became the Deputy Regional Administrator in January 2000.

During his career, Dr. Mallett participated in several major Agency tasks, including the Business Process Reengineering Project in the Office of Nuclear Materials Safety and Safeguards, the first annual revision of the Agency's Strategic Plan and the development of the risk-informed, reactor oversight program.
