

## Dr. Harry A. Wagage

Senior Reactor Engineer  
Office of New Reactors  
U.S. Nuclear Regulatory Commission  
Rockville, Maryland

Dr. Harry A. Wagage is a Senior Reactor Engineer in the Containment and Ventilation Branch 2 in the Office of New Reactors of the U.S. Nuclear Regulatory Commission. He has worked for the NRC since 2002 and is responsible for containment thermal hydraulic analyses. Prior to joining the NRC Dr. Wagage worked for twelve years at SCIENTECH, Inc. performing reactor thermal hydraulic and consequence analysis for operating reactors. Dr. Wagage also conducted severe accident research and analysis for four years at University of California, Santa Barbara.

Dr. Wagage has earned a B.S. in Mechanical Engineering from University of Sri Lanka and an M.S. and a Ph.D. in Nuclear Engineering from Purdue University.
