

Richard L. Emch, Jr.

Rich Emch is a Senior Health Physicist in the Environmental Technical Support Branch in NRO's Division of Site and Environmental Reviews. He is responsible for development of guidance for implementation of the environmental aspects of the new LWA rule. Rich has been with the NRC for 33 years. He was an environmental project manager for Robinson, Millstone, Brunswick, and Vermont Yankee in license renewal group before joining new reactors in 2007. Rich also was involved in evaluating the environmental impacts of radiation protection and postulated accidents for the first three early site permits. Before joining the environmental group, he was a Section Chief for 15 years in environmental and occupational radiation protection, emergency preparedness, safety project management, technical specifications, and design basis accident dose consequence analysis. Rich was also Director of Protective Measures Team at NRC Emergency Operations Center for 15 years.
