

Alexander Klein is currently the fire protection branch chief in the Division of Risk Assessment in the Office of Nuclear Reactor Regulation. He has worked at the NRC for almost 5 years, first as a Senior Fire Protection Engineer and then as a Fire Protection Team Leader. While at the NRC, he has worked on a variety of projects such as rulemaking, generic communications, and licensing actions.

Before joining the NRC, Alex was a consulting engineer to the industry and prior to that was the Lead Fire Protection Engineer for Yankee Atomic Electric Company.

He holds a B.S. in Civil Engineering and is a registered professional fire protection engineer in the Commonwealth of Massachusetts.
