

## **John Butler**

John is the Director of Engineering and Operations Support at the Nuclear Energy Institute. In his current position he is responsible for the direction and coordination of the industry activities with the Nuclear Regulatory Commission covering a range of topical areas that included Generic Safety Issue 191 (PWR Sump Performance).

John has been at the NEI for 13 years. Prior to joining NEI, John worked at Westinghouse where he was involved in advanced plant licensing, thermal/hydraulic analysis and probabilistic risk assessment.

John is a graduate of Mississippi State University (BS Nuclear Engineering) and University of Michigan (MS Nuclear Engineering).
