

## **Ken Canavan**

Ken Canavan has 24 years of experience in the nuclear industry and is currently the Senior Program Manager for the Risk and Safety Management (RSM) program at the Electric Power Research Institute (EPRI). The research activities of his team focus on the development of advanced tools, data, and methods for the risk and safety management areas as well as the application of that technology. Included within the team's scope are risk analysis from all hazards (internal, fire, seismic and other events), consequence analysis, safety analysis, asset management and nuclear plant security.

Mr. Canavan joined EPRI in 2003 as a Senior Project Manager where he was responsible for a wide array of risk technology research projects. Prior to joining EPRI, Mr. Canavan worked for both consultants and utilities in the areas of safety and risk analysis including Data Systems & Solutions, ERIN Engineering and Research, GPU Nuclear, and Toledo Edison. Mr. Canavan holds a Bachelors of Engineering in Chemical Engineer (BChE) with a minor in Nuclear Engineering from Manhattan College (1986).
