

William Fox, III

Bill Fox, Vice President and Project Director in the Shaw Power Division, joined the Shaw Group in July 2008 where he is responsible for the overall management and deployment of two (2) AP1000 nuclear units at the VC Summer site for SCE&G near Columbia, SC. These duties include providing full scope leadership and direction of engineering, procurement, construction (EPC) and start-up of these units.

Prior to joining Shaw, Fox was responsible for the development and implementation of a comprehensive construction and procurement plan for AREVA. This included establishing a construction and procurement management plan, oversight and infrastructure, developing the resource needs and skill sets required, interfacing with ongoing international construction projects, ensuring lessons-learned from those projects were captured, and establishing a baseline construction schedule and target cost estimate for the U.S. EPR project.

Fox also served as the Site Manager for the AREVA Charlotte office facility and also served as AREVA's Corporate Safety Officer.

Fox's prior assignments before taking the position in AREVA's new plant group, was with SGT where he served as President of SGT, with responsibilities for all company activities associated with SGT. SGT is a LLC company comprised of Washington Group International, Inc. (now URS) and AREVA. SGT specializes in steam generator replacement and related large component replacement projects for the nuclear industry.

Specific duties included overall company management including project execution oversight, management of costs, schedules, and resources (engineering, construction, vendors and subcontractors), business interfaces, contract management, planning, marketing/business development management, and ultimate accountability for the P&L of the Company. He served as President from 2000 thru 2005, executing nearly \$1 billion of work over these years and growing the business to over \$500 million in backlog as of January 2006.

His additional experience at AREVA includes large multi-discipline engineering projects in addition to managing EPC (engineering, procurement and construction) projects for the nuclear and related industries.

Prior company affiliations include Duke Engineering & Services and Duke Power Company.

Fox has over 30 years of experience in the electric power generation and related industries, primarily in utility and nuclear related design engineering, licensing, procurement and construction. He has worked on the Advanced Light Water Reactor (ALWR) design certification program in the U.S. for the nuclear industry. He

has managed major projects for new plant design/build programs and also handled major EPC modifications. In addition, he has performed original nuclear plant design engineering as well as fossil and nuclear plant maintenance and modifications.

Fox is a graduate of the University of South Carolina with a Bachelor of Science degree in Civil Engineering and is a registered Professional Engineer in the States of NC, SC, FL, and WI. He is married to wife, Debbie and has four children.
