

## **Dr. J.S. Hyslop – U.S. Nuclear Regulatory Commission**

Dr. J.S. Hyslop is a Senior Reliability and Risk Engineer in the Fire Research Branch in NRC's Office of Nuclear Regulatory Research. He has 17 years of experience in the nuclear field at NRC, and over 10 years in fire PRA. In RES, he plans the fire PRA program, leads its implementation, and participates in the development and review of its products. He currently is supporting NRR in the fire PRA review and FAQ program for the NFPA 805 implementation, and has participated as both an ANS and NRC reviewer for the fire PRA standard. He is the NRC Project Manager for the fire PRA methodology report produced in collaboration with EPRI, NUREG/CR-6850 (EPRI 1011989). Formerly, in NRR, he evaluated the significance of fire protection inspection findings.
