

Robert Jennings

Bob Jennings worked from 1966 to 1987 on control and electrical power systems engineering in the UK's electrical power and defense sectors. Since 1987 he has worked for the UK's Nuclear Installations Inspectorate (NII) primarily focusing on the regulation of safety related control systems. Since August 2007 he has led a team of regulators working on the Generic Design Assessment of the AP1000 and EPR. Areas covered by his team are Deterministic Safety Analysis, Probabilistic Safety Analysis, Human Factors, Radiation Protection, Safety Related Control Systems and Electrical Engineering. Bob also leads NII's regulatory specialists on all matter relating to safety control systems and electrical engineering.
