

Kimberly Keithline

Kimberly is a Senior Project Manager for New Plant Deployment at the Nuclear Energy Institute (NEI). She received her B.S. and M.S. degrees in nuclear engineering from MIT, and spent 17 years working at Naval Reactors, where she was responsible for reactor design, manufacturing, and safety analysis for submarines, aircraft carriers, and land-based training plants. She is now focused on identifying and resolving generic issues related to licensing new commercial nuclear power plants.
