

## **Joseph Kelly**

Mr. Kelly graduated from MIT in 1977 with degrees in Mechanical and Nuclear Engineering. He previously worked at the Pacific Northwest Laboratory, the Commissariat L'Energie Atomique, and the Idaho National Laboratory in the area of reactor safety code development. He has been a member of the Office of Research at the NRC since for the last 13 years. Currently he holds a position in the New and Advanced Reactors branch and is responsible for the development of the NRC's safety analysis evaluation model for high temperature gas reactors.
