

James Kennedy

Mr. Kennedy is a senior project manager in NRC=s Division of Waste Management and Environmental Protection, and has worked in this Division and its predecessors for the last twenty five years. He has worked in all four radioactive waste programsB low-level radioactive waste, high-level waste, decommissioning, and uranium mill tailings. His work has enabled him to become familiar with the wide variety of ways that risk is managed for radioactive materials. He joined the agency in 1980, working as a technical reviewer for the licensing of nuclear power reactors in the Office of Nuclear Reactor Regulation. Prior to 1980, he was employed for a dozen years in the aerospace and scientific and medical products industries as a materials engineer and in several management positions. He earned a degree in Materials Science from Cornell University in 1968.
