

James (Jim) Maddox

Mr. Maddox worked for the Tennessee Valley Authority for 35 year, retiring in 2005 as the Vice President of Engineering and Technical Support. In the early days of his career, he was involved in the design, construction, and startup of TVA nuclear plants. During his tenure at TVA he served in many management positions including Engineering and Support Manager at Sequoyah Nuclear and Manager of Engineering Assurance Plant during the recovery and startup of units 1 and 2, Engineering Manager and Maintenance and Modifications Manager at Browns Ferry Nuclear Plant during the recovery, startup and operation of units 2 and 3, Engineering and Support manager at Watts Barr Nuclear for initial startup and operation, and ending as Chief Engineer and Vice President of Engineering and Technical Support in TVAs corporate office.

After retirement, Mr. Maddox joined INPO and served as A team Manager before moving into his current position of Director of New Plant Deployment.
