

David Matthews

Mr. David B. Matthews currently serves as the Director of the Division of New Reactor Licensing in the U.S. Nuclear Regulatory Commission's (NRC's) Office of New Reactors (NRO). Mr. Matthews leads, manages, and facilitates design certification application reviews, early site permit application reviews, combined license application reviews, and new reactor pre-application activities. He is responsible for developing and maintaining the necessary technical and programmatic support for new reactor licensing activities, guidance development, interaction with stakeholders on issues pertaining to new reactors, large-scale project management tools, schedule and resource planning and tracking, and issuance of design certifications and Combined Licenses (COLs). Mr. Matthews received a MS degree in Physics from Cornell University.
