

Gary Mays

Gary T. Mays is a Group Leader in the Advanced Reactor Systems and Safety, in the Nuclear Science and Technology Division at Oak Ridge National Laboratory where he has been a staff member for 35 years. His recent work at ORNL has focused on the design, operation, control, and safety of nuclear systems for the next generation of fission reactors for terrestrial and space power applications, knowledge management for liquid-metal reactors, and siting options for the U.S. for both large and small reactors. He holds degrees in mathematics (BS), nuclear engineering (MS), and engineering management (MS).
