

Garry Miller

Mr. Miller has held various leadership positions in the Nuclear Generation Group including Robinson Nuclear Plant Engineering Manager, Brunswick Nuclear Plant Engineering Manager, Harris Nuclear Plant Maintenance Manager, and Chief Engineering Manager.

He has held the position of General Manager – Nuclear Plant Development, with the responsibility for new nuclear plant development in both the Carolinas and Florida. Responsibilities included siting, engineering & licensing, including COLA development, and EPC Contract negotiations.

With the creation of the Nuclear Plant Development Department, he currently holds the position of General Manager – Nuclear Engineering & Licensing, responsible for Harris & Levy site engineering, AP1000 design finalization, baseload transmission engineering, and document control & records management.

He has a Senior Reactor Operator (SRO) Certification on the Brunswick Nuclear Plant.

He participated on the Florida Integration Team focused on Crystal River # 3 Nuclear Plant integration with the NGG fleet.

Mr. Miller has a Bachelors of Science (BS) degree in Nuclear Engineering from N.C. State University (1978), and a Masters of Mechanical Engineering (1980), also from N.C. State University.
