

## **Meraj Rahimi**

Meraj started his professional career in 1985 with Jacobs Engineering as a Systems Engineer and later as a Transportation Engineer to develop the transportation system for High-Level waste program. In 1991 he went to E.R. Johnson Associates as a Senior Engineer to continue to work on the Cask System Development project focusing on Burnup Credit for High Waste program. In 1988 he moved to NRC as a Systems Performance Analyst to work on Criticality Safety for Yucca Mountain waste package. In 2002, he transferred to his current position as a licensing project manager for spent fuel storage and transportation casks. He holds a B.C. and an M.S. degrees in Nuclear Engineering from the University of Tennessee.
