

## **Atsushi UI**

Mr. Ui joined JNES in 2004 and has pursued code development and evaluation concerning sump clogging issues as well as establishment of guidance and licensing reviews with Japan's regulatory body, the Nuclear and Industrial Safety Agency (NISA). He specializes in thermal hydraulics and plant system analysis.

Previously, Mr. Ui worked as a nuclear engineer in Nuclear Fuel Industries, Ltd. and had engaged in safety analysis regarding licensing application for all BWRs in Japan.

Mr. Ui earned a bachelor's degree in Mechano-Aerospace Engineering and a master's degree in Nuclear Engineering from the Tokyo Institute of Technology in 1996.
