

## TH30 Fire Protection

This session will discuss fire protection programs for power reactor licensees to comply with fire protection regulations. Licensees may maintain compliance under their approved fire protection program, such as meeting the deterministic requirements of 10 CFR 50, Appendix R. Alternatively licensees may comply with the risk-informed, performance-based requirements in accordance with 10 CFR 50.48(c) - National Fire Protection Association Standard 805.

**Session Chair:** Sunil Weerakkody, Deputy Director for Fire Protection, Division of Risk Assessment, NRC/NRR

### Speakers/Panelists:

NRC Perspective on Fire Protection for Plants not Adopting NFPA 805

*Presentation View*

*Handout View*

*Daniel Frumkin, Team Leader, NRC/NRR*

Industry Perspective on Fire Protection for Plants not Adopting NFPA 805

*Presentation View*

*Handout View*

*Thomas Gorman, Project Manager, Fire Protection Program, PPL Susquehanna, LLC*

NRC Perspective on Risk-Informed, Performance-Based Fire Protection Licensing Basis

*Presentation View*

*Handout View*

*Paul Lain, Program Manager, NRC/NRR*

Industry Perspective on Risk-Informed Fire Protection

*Presentation View*

*Handout View*

*Anil Julka, General Supervisor Fleet PRA Services and Design, Constellation Energy Group*
