

TH40 Risk-Informed Licensing Actions: Recent Experience and New Initiatives

The title of the joint Division of Operating Reactor Licensing (DORL), Division of Risk Assessment (DRA), and Division of Inspection and Regional Support (DIRS) session is "Risk-Informed Licensing Actions: Recent Experience and New Initiatives," and will present a panel of USNRC, industry, and other regulatory representatives. The session will focus on recent licensing approvals, requested supplemental information, and possible future submittals and initiatives.

Session Chair: Michael Markley, Branch Chief, Division of Operating Reactor Licensing, NRC/NRR

Speakers/Panelists:

NRC Approval of Risk-Informed Licensing Actions
Presentation View *Handout View*

Michael Markley, Branch Chief, Division of Operating Reactor Licensing, NRC/NRR

Industry Perspective on Risk-Informed Technical Specification Initiatives
Presentation View *Handout View*

Biff Bradley, Director, Risk Assessment, Nuclear Energy Institute

Status of Risk-Informed Technical Specification Initiatives
Presentation View *Handout View*

Gerald Waig, Senior Reactor Systems Engineer, NRC/NRR

Reliance on Probabilistic Risk Assessment Peer Reviews
Presentation View *Handout View*

Donald Harrison, Branch Chief, NRC/NRR

Plant Experience for Implementation of Risk-Informed Technical Specification Initiatives 4b and 5b - C
Presentation View *Handout View*

Rick Grantom, Manager, Risk Assessment, South Texas Project Nuclear Operating Company
Greg Krueger, Director of Risk Management, Exelon Corporation

Future Risk-Informed Technical Specification Initiatives

Presentation View

Handout View

Kenneth Schrader, Senior Licensing Engineer, Pacific Gas and Electric Company, and Pressurized Water Reactor Owners Group Licensing Subcommittee Chairman
