

## **W10 Licensing Best Practices and Initiatives**

This NRC and Industry panel will provide the regulators and industry's views on best practices observed and proposed for submission of successful licensing actions. Topics that could be included are: Actions that can facilitate a timely review; pre-submittal meetings; the acceptance review process, and effective use of Technical Specifications Task Forces. Additionally, the panel will discuss selected initiatives that are currently being implemented either by industry or the NRC to enhance the preparation, review and disposition of licensing actions.

**Session Chair:** Robert Nelson, Deputy Director, Division of Operating Reactor Licensing, NRC/NRR
