

## **W13 Regulatory Applications of International Operating Experience**

The sharing of operating experience, lessons learned and utilization of safety significant experience among regulators and utilities is essential for the continued safe operation of the world's nuclear power plants. This session will address uses of safety significant operating experience from several of the NRC's international regulatory counterparts and will focus on how the lessons learned have been applied to enhance nuclear safety and regulation in their countries. This exchange of safety and regulatory decisions based upon operating experience will allow the NRC, other regulators, and the nuclear industry to gain a better understanding of how members of the international community have incorporated operating experience in their decisions.

**Session Chair:** Michael Cullingford, Special Assistant, NRC/NRR

### **Speakers/Panelists:**

Regulatory Response to Lessons from International Operating Experience: Examples from Finland

*Presentation View*

*Handout View*

*Jukka Laaksonen, Director General, Radiation & Nuclear Safety Authority (STUK), Finland*

Utilization of Operating Experience in Japan

*Presentation View*

*Handout View*

*Koichiro Nakamura, Deputy Director General, Nuclear Safety and Industrial Safety Agency (NISA), Japan*

Regulatory Applications of French Operating Experience

*Presentation View*

*Jean-Christophe Niel, Director General, Autorite de Surete Nucleaire (ASN), France*

Recent Developments in the Evaluation of Operating Experience in Germany

*Presentation View*

*Handout View*

*Christine Wassilew, Division Head, Nuclear Regulatory Framework, Multilateral Regulatory Cooperation, Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU), Germany*

Utilization of Operating Experience in Korea  
*Presentation View*                      *Handout View*

*Peter C. H. Yun, President, Korea Institute of Nuclear Safety (KINS), Korea*
