

W9 License Renewal Program

This session will provide information and facilitate dialogue on license renewal program improvements as a result of lessons learned from the inspection of plants transitioning into the extended period of operation and guidance document improvements. In this session, information will be provided related to:

- (1) NRC Inspection Procedure (IP) 71002 “License Renewal Inspection”;
- (2) IP 71003 “Post-Approval Site Inspection for License Renewal” including an open dialogue on how to prepare for an IP 71003 inspection;
- (3) Frequently Asked Questions associated with IP 71003;
- (4) NUREG-1801, “Generic Aging Lessons Learned Report”;
- (5) NUREG-1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants”;
- (6) License renewal related additions to other NRC documents such as Inspection Manual Chapter (IMC) – 0612; and,
- (7) Coordination of emerging issues under 10 CFR Part 54 and Part 50.

Session Chair: Brian Holian, Director, Division of License Renewal, NRC/NRR

Speakers:

Generic Aging Lessons Learned
