

RIC 2013
Enhancing Law Enforcement Tactical Responses to Commercial Nuclear Power Reactor Sites

Lou Cubellis, Jr
NRC/Office of Nuclear Security and Incident Response
March 12, 2013

Overview

- NRC interests served through partnership
- NRC involvement in past integrated response activities
- NRC roles in the current program
- Next steps

2

Why the NRC is Interested

- FBI–NRC Memorandum of Understanding
- Beyond Design Basis Threats
- Safety-Security Interface
- Emergency Preparedness Enhancements

3

Past Integrated Response Activities

- Comprehensive Reviews
- Computer-aided law enforcement planning tools
- Integrated Pilot Comprehensive Exercises

4

Roles in the Current Program

- Provide technical expertise
- Help fund computer-aided planning tools
- Ensure information protection
- Help to identify and apply lessons learned

5

Next Steps

- Implement a durable, consistent program:
 - Complete the development of integrated response plans for every site
 - Finish creating computer-aided planning tools for every site
 - Conduct exercises at every site

6

Key Messages

- Four core elements in the Integrated Response Program
- Significant results through partnership
- Enhanced public health and safety

7
