

Industry Perspective: IP-71111.11

Gregg Ludlam – Exelon
Chuck Sizemore - NextEra

History and Background

- Over 10 years of IP-71111.11 experience and understanding
- NOT new, NOT unknown to industry
- Industry strongly agrees with new focus on Operator performance vs. just program performance
- Aligns with INPO/industry focus on Operator fundamentals

2 RC IP-71111.11 Industry Perspective

Industry Insights

- Inspections are more comprehensive and targeted
 - Indicates inspectors are looking deeper, may be uncovering latent issues
 - Utilities are having to adjust to new guidance not previously found in IP or regulation
- Off-year inspection activities are new
 - Not currently time consuming, but could be
 - Resident inspector training on the licensed operator requalification (LOR) program
- Many details in new version are not found any where else
 - INPO ACAD 07-001 guides LOR program
 - Example: remediation requirements, scenario LOD
 - May bypass SAT processes, force station procedure changes

3 RC IP-71111.11 Industry Perspective

Closing

- Industry recognizes value in shift in process
- Industry has interest in how requirements found in the IP and no where else will be enforced
