

Update Process for Approved Transient and Accident Analysis Methods

Jeremy Dean, Branch Chief
Nuclear Performance and Code Review
Office of Nuclear Reactor Regulation
March 11, 2015

1

Current Process for Updating Evaluation Models

- Topical Report
- 2 year review time
- Significant investment of resources by author and NRC
- Benefit of update must outweigh the cost

2

Recognized an Opportunity

- Reduce the cost of performing certain updates
- Increases Safety – Ensuring the most up-to-date information is in the simulation
- Reduces Regulatory Burden

3

Discussion Going Forward

- Nuclear Industry
 - Nuclear Fuel Vendors
 - Owners Groups
- NRC Staff
- Public Involvement – Workshop April XX, 2015
