REGULATORY VIEW ON EFFICIENCY 

The American taxpayer, the rate-paying consumer, and licensees are all entitled to the **best possible management and administration** of regulatory activities. The highest technical and managerial competence is required, and must be a constant agency goal. NRC must establish means to **evaluate and continually upgrade** its regulatory capabilities. Regulatory activities should be consistent with the degree of risk reduction they achieve. Where several effective alternatives are available, **the option which minimizes the use of resources should be adopted**. Regulatory decisions should be made without undue delay.
