

**NRC Program Office
Perspective on Recent
Interactions with CRGR**

Louise Lund
Division Director
Office of Nuclear Reactor
Regulation

**Implementing Recommendations from
CRGR Report (ML17198C141)**

- Specific to CRGR reviews
 - Recommendation was to include in CRGR Charter
 - Rulemaking criteria
 - CRGR consultation on facility-specific backfits
 - Criteria for holding public meeting
- Endorsed by EDO
- Began implementing recommendations concurrent with developing the formal processes – to get benefit as soon as practical

2

Examples of Recent Reviews

- Draft proposed rule on cybersecurity at fuel cycle facilities
- Draft final rule on enhanced weapons, firearms background checks, and security event notifications
- Consultation on the power reactor decommissioning draft proposed rule
- Task Interface Agreement (TIA) – facility specific review
- Regulatory Information Summary – public meeting held

United States Nuclear Regulatory Commission
Protecting People and the Environment

RIC 2018

Observations

- Working out the practical implementation aspects
- Observed that public meeting process could be optimized, particularly in how/when to receive public comments
- Observed that process for discussions on plant-specific backfits could be tweaked to make the discussions more effective and efficient
- Observed that the impact to completion schedules for some affected products are still being assessed (one example - rulemaking schedules)
- Inputs/insights from the more extensive reviews have been helpful
