

Retrospective Review of Administrative Requirements (RROAR)

We Want Your Feedback

Purpose: Identify outdated or duplicative administrative requirements (recordkeeping or reporting) that may be eliminated or modified

Method:

- Collect suggestions from the NRC staff, industry, and members of the public
- Apply a set of five Commission-approved evaluation criteria

Aware of any **outdated** or **duplicative** administrative requirements in Title 10 of the *Code of Federal Regulations*?

If It Should Go, Let Us Know!

General Evaluation Criteria*

Criterion 1

Routine and periodic recordkeeping and reporting requirements not used in last 3 years

Criterion 2

Requirements for reports or records that contain information reasonably accessible to the agency from alternative resources

Criterion 3

Requirements for reports or records that could be modified to result in reduced burden without impacting programmatic needs, regulatory efficiency, or transparency, through—

- *less frequent reporting,*
- *shortened record retention periods,*
- *requiring entities to maintain a record rather than submit a report, or*
- *implementing another mechanism that reduces burden for collecting or retaining information*

Criterion 4

Recordkeeping and reporting requirements that result in significant burden

*For the full criteria, see the *Federal Register* notice (85 FR 6103)

Additional Considerations

Reports or records that contain information used by other Federal agencies, State and local governments, or federally recognized Tribes will be dropped from the review if the information collected is necessary to support the NRC's mission or to fulfill a binding NRC obligation.

These criteria are not intended to be mutually exclusive, and a given regulation may satisfy one or more criteria.
