NRC TO HOLD PUBLIC MEETING WITH VIRGINIA POWER TO DISCUSS INITIAL PLANT LICENSE RENEWAL INSPECTION FOR SURRY AND NORTH ANNA

Nuclear Regulatory Commission officials will meet with Virginia Power Company officials at 9:00 a.m. on February 8 at the company's Innsbrook Technical Center near Richmond to discuss the results of the agency's initial inspection of the company's license renewal program for Surry and North Anna.

The meeting will be open to observation by the public. The Innsbrook Technical Center is located at 5000 Dominion Boulevard in the Richmond suburb of Glen Allen.

NRC officials say the inspection is the first of three planned license renewal reviews for Surry and North Anna and was conducted to verify that the company's license renewal program is implemented consistent with its license renewal application and pertinent regulations. Subsequent NRC inspections will verify that programs are in place to manage the material condition of plant systems, structures and components.

NRC officials will also discuss the license renewal process and the schedule for both Surry and North Anna.
