

About this Download

In addition to the material posted on 9/30/04 the NRC is providing this download which is intended to facilitate the review of the planned NRC changes to the Standard Review Plan for License Renewal (SRP-LR) and the GALL Report. The download will enable reviewers to obtain the collection of updated guidance documents all at the same time. It also includes an excel file containing the data used to prepare the revisions made to the GALL Report's tables in Volume 2. The excel file is set up to support the use of filters, allowing improved visualization of common attributes within the proposed draft GALL Report.

The content of the Standard Review Plan for License Renewal (SRP-LR) and the GALL Report provided in this download is identical to the content of individual preliminary draft guidance documents posted in ADAMS on 9/30/04, but it provides the documents in a Microsoft Word format. This format affords the user access to all of Word's features e.g., the user can decide whether and how to display the changes made to the document using the View|Markup menu selection, and avoid the need to view separate clean and marked-up pdf files. The individual GALL Report tables are also bookmarked to allow more rapid movement to the tables within each chapter.

The Word files in this download also contain links to other information which may facilitate use of the documents and foster a better understanding of the proposed changes. These links relate rolled-up line items in the proposed draft version of the GALL Report to the original GALL Report line items to facilitate identification of the changes. Links also relate selected standard terms in the proposed draft GALL Report to their definitions in a new Chapter IX. Additionally, within the SRP-LR, table line items that reference discussion within the chapter are also linked to that discussion.

Within this download, the GALL Report's tables were changed in their entirety due to the rollup process and the inclusion of standardized terminology. However, the tables are not shown as having been changed in order to minimize the complexity of the file.

When clicking on a link in these documents, if the link opens a related document, the user should close the linked document to return to the initial location in the original document.

The material in the downloadable folder consists of the following:

- NUREG 1800 - Use this folder to view the proposed draft SRP-LR sections of Chapters 3.
- NUREG 1801 - Use this folder to view the proposed draft GALL Report Chapters II through IX. The GALL Report files are separated by chapter (for example, the file "GIV0321.doc" corresponds to GALL Report Chapter IV).
- GALL Master 9-30 – An excel file containing the data used to create the revised GALL Report tables in Volume 2.
- OldNUREG 1801 – This folder contains the currently approved GALL Report (Chapters II through VIII). These files are not intended to be opened directly, but are provided to support the links mentioned above.
