

# Fort Calhoun 4Q/2011 Performance Summary

*Fort Calhoun has been shutdown since April 2011. Because the Unplanned Scrams with Complications (USwC) and Mitigating Systems Performance Index (MSPI) performance indicators (PIs) are heavily influenced by the operational status of the reactor, NRC staff has evaluated the validity of these PIs. Because the reactor has not been critical, there have been no recent opportunities for a scram that would count in the USwC indicator. Similarly, the MSPI values can become skewed because of a lack of critical hours. For these reasons, the staff has determined that these PIs no longer provide valid indications of performance.*

### Performance Indicators

|   |                                       |                                     |                                   |   |                                     |
|---|---------------------------------------|-------------------------------------|-----------------------------------|---|-------------------------------------|
| Unplanned Scrams (N)                    | Safety System Functional Failures (G) | Reactor Coolant System Activity (N) | Drill/Exercise Performance (G)    | Occupational Exposure Control Effectiveness (G) | RETS/ODCM Radiological Effluent (G) |
| Unplanned Power Changes (N)             | Emergency AC Power System (N)         | Reactor Coolant System Leakage (N)  | ERO Drill Participation (G)       |   |                                     |
| Unplanned Scrams with Complications (N) | High Pressure Injection System (N)    |                                     | Alert and Notification System (G) |   |                                     |
|   | Heat Removal System (N)               |                                     |                                   |   |                                     |
|   | Residual Heat Removal System (N)      |                                     |                                   |   |                                     |
|   | Cooling Water Systems (N)             |                                     |                                   |   |                                     |
