Inspection Findings

1Q/2016 Performance Summary

This summary provides the color designation of the most significant inspection findings over the previous 4 quarters. See [Using Performance Indicators](#) on the ROP Framework page for more information.

The Security Cornerstone is an important component of the Reactor Oversight Process which includes various security inspection activities the NRC uses to verify licensee compliance with Commission regulations, ensuring public health and safety. The Commission determined in SRM-SECY-04-0191 titled "Withholding Sensitive Unclassified Information Concerning Nuclear Power Reactors from Public Disclosure" and dated November 9, 2004, that specific information related to findings and performance indicators associated with the Security Cornerstone will not be publicly available to ensure that security-related information is not provided to a possible adversary. Security inspection report cover letters will be available on the NRC Web site, however, security-related information regarding the details of the finding(s) associated with the inspection conducted will not be displayed.
