September 3, 2013

Mr. Michael J. Pacilio  
Senior Vice President, Exelon Generation Co., LLC  
President and Chief Nuclear Officer, Exelon Nuclear  
4300 Winfield Road  
Warrenville, IL 60555

**SUBJECT: MID-CYCLE ASSESSMENT LETTER FOR  
DRESDEN NUCLEAR POWER STATION, UNITS 2 AND 3  
(REPORT 05000237/2013006 AND 05000249/2013006)**

Dear Mr. Pacilio:

On August 14, 2013, the U.S. Nuclear Regulatory Commission (NRC) completed its mid-cycle performance review of Dresden Nuclear Power Station, Units 2 and 3. The NRC reviewed the most recent quarterly performance indicators (PIs) in addition to inspection results and enforcement actions from July 1, 2012 through June 30, 2013. This letter informs you of the NRC's assessment of your facility during this period and its plans for future inspections at your facility.

The NRC determined the performance at Dresden Nuclear Power Station, Units 2 and 3, during the most recent quarter, ending June 30, 2013, was within the Licensee Response Column of the NRC's Reactor Oversight Process (ROP) Action Matrix. In our letter dated July 31, 2013, "Final Significance Determination of a White Finding with Assessment Follow-Up" (ML13213A073) the NRC informed you of the final significance determination of one low-to-moderate safety significant (i.e. White) finding (with corresponding violation) in the Mitigating Systems Cornerstone. This White finding was associated with a deficiency in your external flood response procedure in addressing makeup to the reactor vessel during a potential flooding event and was identified in the first quarter of 2013. The letter also informed you that as a result of the White finding, applicable to both Units 2 and 3, in the Mitigating Systems Cornerstone in the first quarter of 2013, that Units 2 and 3 were assessed as being in the Regulatory Response Column (Column II) of NRC's Action Matrix, effective the first quarter of 2013.

The enclosed inspection plan lists the inspections scheduled through December 31, 2014. Routine inspections performed by resident inspectors are not included in the inspection plan. The inspections listed during the last nine months of the inspection plan are tentative and may be revised at the end-of-cycle performance review. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes. This inspection plan does not include security related inspections, which will be sent via separate, non-publicly available correspondence.

Additionally, once you have notified us that you are ready, we will conduct a supplemental inspection using Inspection Procedure 95001, "Inspection for One or Two White Inputs in Strategic Performance Area." This inspection procedure is conducted to provide assurance that the root cause and contributing causes of risk significant performance issues are understood, the extent of condition and the extent of cause are identified, and the corrective actions are sufficient to prevent recurrence.

In accordance with 10 CFR 2.390 of the NRC's Rules of Practice, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system Agencywide Document Access and Management Systems (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Please contact Ms. Patricia Pelke, Branch 6 Acting Chief, Division of Reactor Projects, at 630-829-9868 with any questions you have regarding this letter or the inspection plan.

Sincerely,

*/RA/*

Kenneth G. O'Brien, Acting Director  
Division of Reactor Projects
