Mr. Christopher R. Costanzo
Vice-President
Duane Arnold Energy Center
3277 DAEC Road
Palo, IA 52324-9785

**SUBJECT: MID-CYCLE PERFORMANCE REVIEW AND INSPECTION PLAN -
DUANE ARNOLD ENERGY CENTER**

Dear Mr. Costanzo:

On August 20, 2009, the NRC staff completed its performance review of the Duane Arnold Energy Center for the period from July 1, 2008, through June 30, 2009. Our technical staff reviewed performance indicators (PIs) for the most recent quarter and inspection results over the previous 12 months. The purpose of this letter is to inform you of our assessment of your safety performance during this period and our plans for future inspections at your facility.

This performance review and enclosed inspection plan do not include security information. A separate letter designated and marked as "Official Use Only-Security Information" will include the security cornerstone review and resultant inspection plan.

By letter dated June 9, 2009, you were notified that plant performance was within the Regulatory Response column of the NRC action matrix. This was due to a White finding involving the failure to promptly identify and correct a condition adverse to quality which resulted in the 'B' emergency diesel generator output breaker tripping under full load conditions while conducting a monthly surveillance test. Plant performance for the recent quarter at Duane Arnold Energy Center remained within the Regulatory Response column of the NRC's Action Matrix.

The enclosed inspection plan details the inspections, including baseline and other infrequently conducted inspections, less those related to security, scheduled through December 31, 2010. The inspection plan is provided to allow for the resolution of any scheduling conflicts and personnel availability issues well in advance of inspector arrival onsite. Routine resident inspections are not listed due to their ongoing and continuous nature. The inspections in the last 9 months of the inspection plan are tentative and may be revised at the End-of-Cycle review.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

If circumstances arise which cause us to change this inspection plan, we will contact you to discuss the change as soon as possible. Please contact Kenneth RiemerT at (630) 829-9628 with any questions you may have regarding this letter or the inspection plan.

Sincerely,

/RA/

K. Steven West, Director
Division of Reactor Projects
