September 1, 2009

Mr. Charles G. Pardee  
Senior Vice President, Exelon Generation Company, LLC  
President and Chief Nuclear Officer, Exelon Nuclear  
4300 Winfield Rd  
Warrenville, IL 60555

**SUBJECT: MID-CYCLE PERFORMANCE ASSESSMENT LETTER –  
PEACH BOTTOM ATOMIC POWER STATION**

Dear Mr. Pardee:

On August 13, 2009, the NRC staff completed its performance review of Peach Bottom Atomic Power Station (PBAPS). Our technical staff reviewed performance indicators (PIs) for the most recent quarter and inspection results for the period from July 1, 2008 through June 30, 2009. The purpose of this letter is to inform you of our assessment of your safety performance during this period and our plans for future inspections at your facility.

The performance review and enclosed inspection plan do not include physical protection information. A separate letter designated and marked "Official Use Only—Security Information" will include the security cornerstone review and resultant inspection plan.

Plant performance for the most recent quarter at Peach Bottom Units 2 and 3 was within the Licensee Response column of the NRC's Action Matrix, based on all inspection findings being classified as having very low safety significance (Green) and all PIs indicating performance at a level requiring no additional NRC oversight (Green). Therefore, we plan to conduct reactor oversight process (ROP) baseline inspections at your facility.

In our annual assessment letter dated March 4, 2009 (ML090620792)<sup>1</sup>, we informed you of an existing cross-cutting theme in the aspect of Human Performance-Resources-Procedure Adequacy (H.2(c))<sup>2</sup>. During the past six months, the NRC staff reviewed your plans and corrective actions for this cross-cutting theme. To date, these actions appear to be adequate and effective given there has been only one new finding with a cross-cutting aspect of H.2(c) in the last two quarters. Since there is one inspection finding for the current twelve month assessment period with a cross-cutting aspect in H.2(c), the cross-cutting theme no longer exists.

---

<sup>1</sup> Designation in parenthesis refers to an ADAMS accession number. Documents referenced in this letter are publicly available using the accession number in ADAMS.

<sup>2</sup> This is a descriptor that correlates to this cross-cutting aspect in Inspection Manual Chapter 0305, "Operating Reactor Assessment Program."

Additionally, on January 6, 2009, the staff issued a severity level III Notice of Violation (NOV), with a \$65,000 civil penalty, in accordance with the NRC's Enforcement Policy (ML083530084). This NOV and civil penalty were the final NRC actions with regard to the inattentive security officer issue which was discovered in September 2007. No further followup actions are planned, since your corrective actions and NRC's assessment thereof have already been completed, documented, and are available to the public (ML073090061, ML073550590, ML072920283, ML080440012, ML081970338, ML082410183, and ML082420606).

The enclosed inspection plan details the inspections, less those related to physical protection, scheduled through December 31, 2010. The inspection plan is provided to allow for the resolution of any scheduling conflicts and personnel availability issues well in advance of inspector arrival onsite. Routine resident inspections are not listed due to their ongoing and continuous nature. The inspections in the last nine months of the inspection plan are tentative and may be revised at the end-of-cycle review.

In accordance with 10 CFR Part 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

As you may know, the NRC is currently evaluating the scope and frequency of all the baseline inspection procedures as part of our biennial review of the ROP. If the results of the evaluation, or any other circumstances, cause us to change the inspection plan, we will contact you to discuss the change as soon as possible. Please contact me at (610) 337-5120 with any questions you may have regarding this letter or the inspection plan.

Sincerely,

**/RA/**

Paul G. Krohn, Chief  
Division of Reactor Projects  
Projects Branch 4
