SUBJECT: UPDATED INSPECTION PLAN FOR SEABROOK STATION, UNIT NO. 1
(REPORT 05000443/2017005)

Dear Mr. Nazar:

The enclosed inspection plan lists the inspections scheduled through June 30, 2019, for Seabrook Station, Unit 1 (Seabrook). The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. Routine inspections performed by resident inspectors are not included in the inspection plan. The inspections listed during the last twelve months of the inspection plan are tentative and may be revised. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes. This inspection plan does not include the plan for security-related inspections, which will be sent via separate, non-publicly available correspondence.

In addition to baseline inspections, the NRC plans to conduct Inspection Procedure (IP) 60855.1, "Operation of an Independent Spent Fuel Storage Installation at Operating Plants." As previously noted in the annual assessment letter dated March 1, 2017 (Report 05000443/2016006; ADAMS Accession No.: ML17059C016¹) regarding the Alkali-Silica Reaction (ASR) concrete issues, the NRC will continue to provide focused oversight of NextEra's assessment of ASR progression in Seabrook's concrete structures using Problem Identification and Resolution (PI&R) annual samples. While tentative dates for these ongoing inspections are included in the attached inspection schedule, we understand that your schedule is subject to change. We will coordinate closely with your ASR project management staff to select the most appropriate opportunities to inspect your activities.

¹ The designation in parentheses refers to an Agencywide Documents Access and Management System (ADAMS) Accession Number. Documents referenced in this letter are publicly available using the Accession Number in ADAMS.

M. Nazar
