SUBJECT: FOURTH ANNUAL REPORT - BROADCASTING OF COMMISSION MEETINGS OVER THE INTERNET

In response to SECY-01-0077, "Broadcasting of Commission Meetings Over the Internet," the Commission issued a Staff Requirements Memorandum (SRM) dated June 7, 2001, approving the broadcast of live and archived Commission meetings for viewing on the Internet. The SRM directed the staff to report to the Commission annually on Webcast system usage and associated program costs. This memorandum provides the report for FY 2005.

During FY 2005, 23 Commission meetings were broadcast live over the Internet, and an archived version of each meeting was subsequently made available for delayed viewing. Also during this period, the opening remarks and Commission Plenary Sessions at the 2005 NRC Regulatory Information Conference (RIC) were made available for archived viewing.

As illustrated in Enclosure 1, audiences for both the live and archived Webcasts continued to grow during FY 2005, with non-NRC viewers comprising the larger increase. During FY 2005, NRC Webcasts attracted 5,168 viewers. It should be noted that because many system firewall protection schemes prevent identifying multiple hits by the same viewer, these unique viewer statistics are only approximate. The 5,168 viewers in FY 2005 represent an increase of 87% over the viewers in FY 2004, a 164% increase over the viewers in FY 2003, and a 235% increase over the viewers who watched NRC's Webcasts in FY 2002. Further, as reflected in Enclosure 2, these significant increases in total viewers have occurred without a substantial rise in the number of meetings Webcast annually.

In Enclosure 3, the size of the viewing audience for each FY 2005 live and archived Webcast is provided, with a breakout of the NRC and non-NRC viewers.

In Enclosure 4, a graphic breakdown of the major affiliations of the NRC's Webcast audience is outlined, as identified in the Webcast survey responses received in FY 2005. The affiliations continue to reflect a diverse audience of NRC and other Government staff, utility personnel, public interest groups, and the general public.

Commissioner Merrifield's comments on COMSECY-05-0057:

I am very pleased to see that the use of webcasting of Commission meetings has expanded rapidly over the past four years and that the overall costs of the program have decreased. I believe the information provided to the Commission in this annual report on this important and effective communication tool is very useful. I do not approve the staff's recommendation to eliminate future submission of this report to the Commission. This type and level of information is not provided to the Commission during the annual budget process.
