COMMENTS: Below X Attached None

I support the policy decision reached in the COM and agree with Commissioner Ostendorff's assessment that the Commission has the requisite information to make a policy decision with regard to the regulation of structures, systems, and components in the Balance of Plant at NRC-licensed nuclear power plants.

I approve of the direction to the Staff to respond to the August 9, 2010 NERC letter via Commission correspondence by September 30, 2010. Additionally, I approve of the proposal for an information paper to be delivered to the Commission from the staff by October 30, 2010, and look forward to hearing from the staff the details associated with the implementation of this policy decision.
