**Chairman Diaz's Comments on SECY-05-0144, Proposed Rule; 10 CFR Part 63:
"Implementation of a Dose Standard After 10,000 Years" (RIN 3150-AH68)**

I commend the staff for preparing a well-focused, timely proposal to revise 10 CFR Part 63 to be consistent with the Environmental Protection Agency's (EPA's) draft revised standard for the proposed high level waste repository, and I approve the staff's recommendation to publish this proposal in the *Federal Register* for a 60-day public comment period. The staff should closely monitor developments regarding the EPA's draft standard, and should inform the Commission immediately of any issues that could impact completion of our rulemaking. The staff should also keep the Commission apprised of significant comments on both the NRC and EPA proposals.
