COMMENTS: Below Attached None

I take no position on this paper at this time. This is a very complex policy matter, particularly considering the uncertainties in health effects from exposure to radiation at low levels. The Commission should have had the benefit of the views of the Advisory Committee on Reactor Safeguards (ACRS) before deciding on such a significant policy issue of public health and safety.

In the future, the staff and ACRS should coordinate their schedules so that the staff papers and the related ACRS letters will be submitted to the Commission within a reasonable time of each other.
