Observation of Safety and Safeguards Programs at Rokkasho Reprocessing Plant in Japan

From December 9 through 20, 2009, staff from the Office of Nuclear Material Safety and Safeguards (NMSS), Division of Fuel Cycle Safety and Safeguards travelled to Japan to: (1) conduct information exchange activities and discuss regulatory experience with the appropriate Japanese safety and safeguards regulators providing oversight for used nuclear fuel reprocessing facilities in Japan; (2) observe implementation of the material control and accounting program and to conduct safety/risk analyses for the Rokkasho reprocessing plant; and (3) conduct a technical tour of the Tokai reprocessing plant. The visit was coordinated with the Department of Energy (DOE) and funded under the DOE/NRC Interagency Agreement on advanced fuel cycle.

December 17, 2009, Meeting with Transnuclear Inc. to Discuss a Proposed Amendment

On December 17, 2009, the NRC staff from NMSS, Division of Spent Fuel Storage and Transportation, met with Transnuclear Inc. (TN) to discuss a proposed amendment to a Certificate of Compliance for a transportation package used to transport uranium oxide pellets and powder. TN will provide additional drop testing results, which reflect the most damaging configuration of the package and corresponding criticality analyses. TN will submit the proposed amendment by the end of 2009.

Draft Technical Basis for Rulemaking Revising Security Requirements for Facilities Storing Spent Nuclear Fuel (SNF) and High Level Waste (HLW): Notice of Availability and Solicitation of Public Comments (10 CFR PARTS 72 and 73) NRC-2009-0558

On December 16, 2009, the NRC published a document (74 FR 66589) in the *Federal Register* seeking input from the public, licensees, certificate holders, and other stakeholders on a draft technical basis for a proposed rulemaking that would revise the NRC's security requirements for the storage of SNF at an Independent Spent Fuel Storage Installation (ISFSI) and the storage of SNF and/or HLW at a Monitored Retrievable Storage Installation (MRS). This contemplated rulemaking would also make conforming changes to the ISFSI and MRS licensing requirements for security plans and programs. The NRC has developed a draft technical basis for this proposed rulemaking that describes the agency's overall objectives, conceptual approaches, potential solutions, integration with agency strategic goals, and related technical and regulatory clarity issues. The NRC will conduct a public Webinar on January 14, 2010, to discuss the draft technical basis and to facilitate the public's and stakeholders' submission of informed comments. The comment period on the draft technical basis closes January 31, 2010.
