Public Meeting on National Fire Protection Association Standard 805 (NFPA 805)

On March 17, 2010, the staff held a Category 3 public meeting with external stakeholders and interested members of the public to discuss template guidance for nuclear plants transitioning to NFPA 805. The staff provided preliminary feedback to the Nuclear Energy Institute on certain sections of the NFPA 805 License Amendment Request Template and shared a draft section of the NFPA 805 Safety Evaluation Template.

Fire Protection Meeting on NFPA 805 Frequently Asked Questions (FAQs)

On March 18, 2010, the staff held a Category 2 public meeting with the Nuclear Energy Institute NFPA 805 Task Force and other stakeholders to discuss the FAQs related to licensees' adoption of NFPA 805. The staff began holding these monthly public meetings in July of 2006 and expects to continue to hold them at least throughout the transition period for the pilot plants adopting NFPA 805.

Technical Briefing Session to the Mexican Regulator on Steam Dryers

On March 18, 2010, the staff participated in a briefing with the Mexican regulator, National Nuclear Commission for Safety and Safeguards, regarding the review of steam dryers associated with extended power uprate (EPU) reviews. The Mexican regulator provided the staff with an overview of the issues that they have identified related to the steam dryers associated with Mexico's Laguna Verde EPU application. The staff provided a history of the boiling water reactor EPU reviews that had been completed and of those that were currently still under review and the specific issues that have been raised. In addition, the staff discussed the review status of the steam dryer-associated topical reports.

Public Meeting on Risk Tools Enhancement Program

On March 18, 2010, the staff held a Category 2 public meeting with external stakeholders and interested members of the public to discuss the Risk Tools Enhancement (RTE) Program. At the meeting, staff presented RTE activities currently underway to enhance the efficiency and effective use of NRC risk tools.

Task Working Group #6 Meeting with Industry

On March 24, 2010, the staff held a public meeting at NRC headquarters with representatives from the industry to discuss their comments on the latest draft of interim staff guidance (ISG) #6. The staff agreed with many of the industry's comments. In addition, several comments were considered out of scope, stemming from industry's desire to revise the review process rather than clarify it. Action items were taken away to investigate some of their comments. The attendees at the meeting were unable to get through the 183 comments, and a schedule for a subsequent meeting was agreed to.

Publication of Regulatory Guide (RG) 1.126, Revision 2, "An Acceptable Model and Related Statistical Methods for the Analysis of Fuel Densification."

On March 23, 2010, the staff published an RG that describes an analytical model and related assumptions and procedures that the staff considers acceptable for predicting the effects of fuel densification in light-water-cooled nuclear power reactors. RG 1.126 is available on the NRC Web site at <http://www.nrc.gov/reading-rm/doc-collections/reg-guides/power-reactors/rg/>.

Publication of Draft Regulatory Guide 2004 (DG-2004) "Emergency Planning for Research and Test Reactors."

On March 24, 2010, the staff issued DG-2004 to provide an opportunity for public comments. The DG is proposed Revision 1 to RG 2.6 that provides licensees and applicants with a method that the staff considers acceptable for use in complying with the Commission's regulations on the content of emergency plans for research and test reactors. DG-2004 is available on the NRC Web site at <http://webwork.nrc.gov:300/reading-rm/doc-collections/reg-guides/res-test-reactors/draft-index.html>.

Controlled Unclassified Information Briefing

On March 24, 2010, OIS staff briefed the Information Security Steering Committee on the status of the transition to the Controlled Unclassified Information (CUI) Framework. The purpose of the briefing was to update the committee on the progress made in developing the CUI policy since the last time the committee was briefed on November 9, 2009. Specifically, they were told about the pending issuance of a CUI Executive Order (EO), which is expected in April 2010, which will be followed by the publication of an implementing directive, most likely in the summer of 2010. They were also provided an explanation of how the Safeguards Program will be incorporated into the EO.
