Issuance of the Palo Verde Nuclear Generating Station License Renewal Generic Environmental Impact Statement, Supplement 43, Final Report

On January 3, 2011, the staff issued Supplement 43 to NUREG-1437, "Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding Palo Verde Nuclear Generating Station, Final Report." This supplemental environmental impact statement (SEIS) includes the staff's analysis that considers and weighs the environmental effects of the proposed action, the environmental impacts of alternatives to the proposed action, and mitigation measures available for reducing or avoiding adverse impacts. It also includes the staff's recommendation regarding the proposed action: that the adverse environmental impacts of license renewal for Palo Verde Nuclear Generating Station are not great enough to deny the option of license renewal for energy-planning decision-makers. The final SEIS is publicly available in ADAMS using Accession No. ML103560149. The staff will issue a *Federal Register* notice on the availability of the final SEIS.

Publication of Revision 2 of Regulatory Guide (RG) 3.71, “Nuclear Criticality Safety Standards for Fuels and Material Facilities”

On January 3, 2011, the RES staff published revision 2 of RG 3.71, “Nuclear Criticality Safety Standards for Fuels and Material Facilities.” This guide endorses—with some exceptions—specific nuclear criticality safety standards developed by the American Nuclear Society’s Standards Subcommittee 8 (ANS-8), “Operations with Fissionable Materials Outside Reactors.” RG 3.71 was developed to provide guidance, criteria, and best practices for use in preventing and mitigating criticality accidents during operations that involve handling, processing, storing, and/or transporting special nuclear material at fuel and material facilities. The guide is not intended for use by nuclear reactor licensees. RG 3.71 is available on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/reg-guides/fuels-materials/rg/>.

Office of Public Affairs (OPA)
Items of Interest
Week Ending January 7, 2011

OPA Received Significant Media Inquiries on the Following:

The contentions being considered by the Atomic Safety and Licensing Board panel handling the Calvert Cliffs nuclear plant's (Maryland) new reactor proceeding.

Patient release criteria for patients treated with radioactive iodine-131.

Briefs submitted by Nevada and the U.S. government on the Yucca Mountain case in the District Court of Appeals.

Other Public Affairs Items

OPA pushed back with Newsweek reporter on a story that erroneously reported that a spent fuel fire would be a foregone conclusion were a storage pool drained by a terrorist attack.

OPA did a recorded interview with WOBN-FM (of Ocean County, New Jersey) discussing the NRC's take on an appeal by environmental groups of the NRC's decision in 2009 to relicense Oyster Creek nuclear power plant (New Jersey).

OPA did a radio interview with the South Carolina News Network about the predecisional enforcement conference with the Westinghouse fuel plant near Columbia, South Carolina.
