Public Meetings on Draft Supplemental Environmental Impact Statement (SEIS) for Grand Gulf Nuclear Station

On January 29, 2014, the staff held two identical public meetings in Port Gibson, Mississippi, to discuss the preliminary findings of, and receive public comments on, the draft supplemental environmental impact statement (SEIS) on the proposed renewal of the operating license for Grand Gulf Nuclear Station, Unit 1. The preliminary finding of this report is that the adverse environmental impacts of license renewal for Grand Gulf are not great enough to deny the option of license renewal for energy-planning decision-makers. Approximately five people attended each meeting. The public comment period will close on February 11, 2014. The staff plans to issue the final SEIS by September 2014.
